Bug Logs

Testing Overview

- Testing Framework: Jest
- Test Type: Unit & Integration Tests
- Database Used: MongoDB
- Service Testing: API endpoints tested using mock servers and middleware validation

Total Test Suites: 35

Total Tests: 215

All Tests Passed Successfully

```
PASS tests/utils/asyncHandler.test.js
```

```
Test Suites: 35 passed, 35 total
```

```
Tests:      215 passed, 215 total
```

```
Snapshots:  0 total
```

```
Time:       16.915 s, estimated 32 s
```

```
Ran all test suites.
```

Bug Log Summary

During the testing phase, several logs and console outputs were generated to trace data flow and verify module operations. Below is the complete Jest test log output representing successful execution across all controllers, models, utilities, and middleware files.

```
> fixly-server@1.0.1 test
> jest --runInBand
```

```
PASS tests/controllers/reportController.test.js
PASS tests/models/user.model.test.js
PASS tests/middleware/auth.middleware.test.js
PASS tests/controllers/adminController.test.js
PASS tests/controllers/specificReportController.test.js
```

- Console

```
console.log
```

```
Revenue report request received: {}
```

```
at log (controllers/specificReportController.js:137:11)
```

```
console.log
```

```
User: { id: 'mockUserId', userType: 'admin' }
```

```
at log (controllers/specificReportController.js:138:11)
```

```
console.log
```

```
Revenue report request received: { startDate: '2023-01-01', endDate: '2023-01-03' }
```

```
at log (controllers/specificReportController.js:137:11)
```

```
console.log
```

```
User: { id: 'mockUserId', userType: 'admin' }
```

```
at log (controllers/specificReportController.js:138:11)
```

```
console.log
```

Tests: 215 passed, 215 total

Snapshots: 0 total

Time: 16.915 s, estimated 32 s

Ran all test suites.

Conclusion

All system components were tested successfully, validating the reliability and correctness of the Fixly backend. The zero-test-failure rate demonstrates strong modular design and adherence to SOA principles.

This testing phase confirms that the platform is ready for deployment and further integration with the front-end modules and external services.
